## GENERAL INTRODUCTION

### PROVENANCE

The papers were received in February 2010 from the National Cataloguing Unit for the Archives of Contemporary Scientists, Bath by kind permission of Dr David Jones, Acting Master, Christ's College, Cambridge.

### OUTLINE OF THE CAREER OF DAVID EDWIN COOMBE

David Edwin Coombe was born in Bath, Somerset on 9 March 1927. He was the only child of Charles and Phyllis Coombe (née Weaver). He was educated at Twerton Infants' School, Bath and King Edward's School, Bath. From an early age he displayed an interest in botany and diary writing. As a teenager, in 1943 he joined the Youth Service Volunteers as part of the war effort.

Coombe went to Christ's College, Cambridge in 1945 on a scholarship and read Natural Sciences (Botany). He became a research fellow in 1951 and a lecturer in 1952. Coombe's PhD was awarded in 1952 for *Plant Growth and Light in Woodlands*. The work was a study of the dry weight balance of *Impatiens parviflora* in relation to light climate and was notable for Coombe's use of the Robin Hill hemisphere camera to study woodland canopy light. Coombe spent his entire professional career at Christ's College, Cambridge and held a number of formal offices during his time. These included Tutor and Director of Studies, member of the College Council, member of the College Living Committee, and Honorary Garden Steward. He formally retired in 1989.

In the 1940s and 1950s Coombe took part in a number of international expeditions. He travelled to Iceland in 1946, Norway in 1947 and 1950, Germany in 1951, British West Africa over 1953-1954, and Austria in 1956.

Coombe also carried out fieldtrips in the British Isles. A number of locations came to dominate his research. He made many trips to the Lizard, Cornwall from 1950 onwards. He repeatedly visited a number of ecologically interesting woodland locations in Cambridgeshire. He also made repeated visits to the Brecklands region of East Anglia.

Coombe's principal research interests included plant growth in relation to light conditions; climate and physical factors governing the existence of specialised habitats; the study of specialised habitats over extended time periods; and the value of historical sources for the study of ecology. Coombe was noted for valuable observations in the study of ecotypic differentiation and for his specialist knowledge of the genera *Juniperus* and *Trifolium*.

From the late 1970s Coombe's health became an issue and affected his output. He nevertheless continued to work and publish. He died in Cambridge on 28 June 1999.

### DESCRIPTION OF THE COLLECTION

The material is presented in the order given in the contents list. It covers the period from 1918 to 2000.

Section A, Biographical, contains items relating to Coombe's childhood and education in Bath, Somerset as well as diary and notebook material spanning the 1930s-1990s. There are a variety of identity cards, certificates, passports, etc. that document family life and activities. Coombe's education in Bath is well represented with material from his time at Twerton Infants' School and King Edward's School. A sub-section of scrapbooks, diaries and notebooks provides evidence of his observational abilities from childhood into adulthood. The material is of interest for its descriptions of a boy's life in wartime Bath and as an illustration of how Coombe's enthusiasm for ecology began at an early age and thereafter developed into a professional vocation. Coombe's undergraduate and postgraduate education is not well represented but a copy of his PhD thesis *Plant Growth and Light in Woodlands*, Christ's College, Cambridge, 1952, can be found at A.64.

Section B, Research Interests: British Isles and International Habitats, is comprised of material closely associated, and illustrative of, Coombe's interests in particular habitats. The material relating to the Cambridgeshire woodland and fen habitats is primarily of a land management or teaching nature. Coombe used the habitats for teaching associated with the Environmental Biology course at the University of Cambridge. The University's formal association with some of these habitats is in evidence.

Coombe's extended association with the Lizard, Cornwall for research and teaching purposes is well represented with research data in the form of plant lists, soil samples, etc. There is correspondence and associated papers relating to the process by which parts of the landscape were eventually

designated with National Nature Reserve status. There is a comprehensive collection of field notebooks by Coombe and associates covering the period 1954-1996. The Lizard material also comprises a collection of unpublished reports of the University of Bristol Lizard Project 1981-1987.

Other British Isles locations are represented in the section but the material relating to the Brecklands of East Anglia indicate a particular interest of Coombe's. There is documentation of a research data and teaching nature relating to features of the landscape that interested him such as stripe and polygon formations and the natural eutrophic lakes of the region.

The international material relates to trips to Iceland, Norway, Nigeria and West Africa and Europe. In addition to research data there is correspondence, notebooks and reports that provide detail of aspects such as travel and working in these foreign locations. Photographic material relating to the above was integral to Coombe's work. Some is to be found within this section but the majority is located in Section G, Photographs. The section concludes with Coombe's comprehensive collection of Ordnance Survey maps. These are annotated with field trip plant recordings and dates.

Section C, Research Interests: Research Data and Plants, includes material relating to Coombe's interest in historical ecology; research data on the relationship of plant growth to light factors; and Coombe's accumulation of plant data which he organised by alphabetical species/genera files and index cards. There is also a general notebook sequence.

The sub-section on historical ecology contains material indicative of Coombe's interest in the use of historical sources to supplement study of the ecology of habitats. The bulk of the material here relates to historical sources for the Lizard, Cornwall and Newmarket Heath, Suffolk. Use of historical sources is evident throughout the archive.

Notebooks and other research papers comprise the material found in the sub-section on research data. There is some material relating to stripe features in the landscape and research in the 1970s at Cambridge University Botanic Garden. The majority relates to the research he carried out into plant growth and light in the 1940s and 1950s and may therefore be related to his PhD thesis (see A.64).

There is a sequence of files arranged by Coombe in alphabetical order by species or genus name and containing correspondence and notes mainly relating to issues of identification and occurrence. Coombe also maintained two sets of index cards, one set is international, and the other is for Great Britain. The index cards record species occurrence.

A sequence of notebooks described by Coombe as 'general notebooks' covers the period 1948-1994. They contain research data and field trip notes. There is some material in these relating to a

trip to Germany in 1951 but the majority relates to repeated field trips to the Cambridgeshire woodlands, the Lizard, Cornwall, and the Brecklands of East Anglia.

Section D, Societies and Organisations, is a small section but it does contain a good collection of *The Lizard* the magazine of the Lizard Field Club covering the period 1955-1990. There is also material of a more biographical nature such as the papers relating to Coombe's participation in the Youth Service Volunteers during World War Two and to his active membership of the Auxiliary Fire Service in the 1950s and 1960s.

Section E, University of Cambridge, contains material relating to teaching and research. There is a sequence of notebooks for the period 1957-1967 in which Coombe wrote the text of his undergraduate environmental biology lectures. These are annotated with revisions. Included here are Coombe's notes from a lecture given in 1957 by ecologist A.S. Watt. More of Coombe's undergraduate lecture material can be found in a collection of folders covering the years 1941-1989. These also contain material relating to the fieldtrips associated with the course. There is some material relating to teaching and research at Cambridge University Botanic Garden.

Section F, Correspondence, consists of frequent correspondence relating to the occurrence of plant species in specific localities. There is an extensive correspondence with Coombes' parents. Many of the correspondents are represented by just one or a few letters but there is more comprehensive correspondence for botanists Rosemary Fitzgerald and Lewis C. Frost.

Section G, Photographs, contains a thorough collection of photographic prints, photographic film negatives, glass plate negatives, glass plate lantern slides, and film transparencies. Photographs of a biographical nature show Coombe as a boy, an academic, and as a member of the Auxiliary Fire Service. There are sub-sections for plant photographic material arranged alphabetically by species or genera; date; location; and research interest. Coombe's leading work on the scientific application of hemisphere photography is well represented. Coombe's expeditions to Iceland, Norway, Germany and British West Africa, as well as his field trips, over the course of many years, to the Cambridgeshire woodlands, the Lizard, Cornwall and the East Anglian Brecklands, are all well represented.

Section H, Publications, contains a collection of Coombe's authored or co-authored published scientific papers covering the period 1951-1996. The draft material in this section covers the period 1947-1999 and includes much relevant correspondence. A sub-section on invitational lectures and conferences indicates Coombe's moderate activity in this area.

Section J, Horsell Papers, is the smallest section in the catalogue. It consists of the papers of amateur botanist, and resident of Bath, Somerset, Miss M. Horsell. An explanation of exactly how the material came to be in Coombe's possession is unavailable. Two notebooks record plant species locations in the Somerset locality. A third notebook contains a manuscript transcript of *Flora Bathoniensis: or, A Catalogue of the Plants Indigenous to the Vicinity of Bath*, C.C. Babington, 1834. Correspondence and associated hand drawn maps relate to locations of plants of interest recorded on field trips by various individuals and apparently collated by Horsell.

There is also an index of correspondents.

#### ACKNOWLEDGEMENTS

We are very grateful for the assistance of Dr Patrick Zutshi, Keeper of Manuscripts and Archives at Cambridge University Library.

A.22	Correspondence and papers <i>re</i> the estate of Coombe's paternal grandmother Elizabeth Coombe, 1946-1949.  The material relates to the administration of a trust fund set up in Coombe's name.	
A.23	Correspondence and papers <i>re</i> the sale of 'Chanctonbury', 90 Entry Hill, Bath, Somerset, 1950.  This was the family home at which Coombe grew up. It was sold when Phyllis Coombe moved to Salisbury, Wiltshire to be with her husband Charles Coombe who had secured a position with the Ministry of Supply.	

- A.24-A.45 Correspondence and papers *re* properties in Salisbury, Wiltshire, 36 Chesterton Towers, Cambridge and matters relating to the estates of Charles Coombe, Phyllis Coombe and Coombe's own estate, 1950-1999.
- In 1952 Charles Coombe built a house named 'Little Wiston', at Harnwood Road. This was sold in 1961 and Charles and Phyllis Coombe built another dwelling named 'Padley', at Homington. Charles Coombe passed away in 1962. 'Padley' was sold in 1969 and Phyllis Coombe built a new dwelling at 11 Constable Way, Harnham. After her death in 1981 Coombe sold 11 Constable Way and bought a flat for himself at 36 Chesterton Towers, Cambridge.
- The material is arranged in chronological order.
- 22 folders.

A.136	Motoring log, 1964-1967.

**SECTION B RESEARCH INTERESTS: BRITISH ISLES AND INTERNATIONAL HABITATS B.1-B.625a**

The section illustrates Coombe's interest in particular habitats. As regards the British Isles locations the papers relate to aspects of management, research and teaching. In most cases, over extended periods of time. In particular, the material shows Coombe's close association with the unique woodlands of Cambridgeshire, the Lizard, Cornwall and the Brecklands of East Anglia. There is a sub-section of material relating to international locations. Coombe visited Iceland, Norway, Nigeria and West Africa, and Europe in the 1940s and 1950s. Coombe's approach to ecological research in these environments, and his interest in a variety of habitats, is illustrated via research data, notebooks and correspondence.

Associated photographic material is to be found both in this section and in Section G, Photographs.

The section concludes with Coombe's comprehensive collection of Ordnance Survey maps. These are annotated with field trip plant recordings and dates.

B.1-B.360	BRITISH ISLES HABITATS
B.361-B.425	INTERNATIONAL HABITATS
B.426-B.619	ANNOTATED MAPS: UNITED KINGDOM
B.620-B.625a	ANNOTATED MAPS: FRANCE

**B.1-B.360 BRITISH ISLES HABITATS 1920-2000**

The papers in this sub-section relate to locations of research interest to Coombe within the British Isles. In most cases Coombe has made more than one visit to the locations during his career.

A portfolio of outsize material has been incorporated into the sequence. A collection of annotated national and international maps is presented at the end of the section.

Locations are presented in alphabetical order first by county and then by regions.

B.1-B.99	Cambridgeshire
B.100-B.254	Lizard Peninsula, Cornwall
B.255-B.273	Purbeck, Dorset
B.274-B.276	Royston Heath, Hertfordshire

<b>B.1-B.99</b>	<b>Cambridgeshire</b>	<b>1948-1997</b>
B.1-B.18	Buff Wood and Hayley Wood, Cambridgeshire.  Buff Wood and Hayley Wood are ancient woodland habitats which are used by the University of Cambridge for Environmental Biology teaching and research.	
B.1-B.8	Papers of the Buff Wood Management Committee a sub-committee of the Cambridge University Botanic Garden Syndicate. Coombe was a member of both during the period covered by the documentation. The wood was managed for University of Cambridge research and teaching purposes.  The material consists of a folder of correspondence, reports, maps, and papers <i>re</i> estate management and fieldtrips, divided into eight for ease of reference.  Arranged in chronological order.

B.9	Field notebook <i>re</i> Buff Wood excursion, 1968.
B.10, B.11	Environmental Biology course supporting notes and maps <i>re</i> teaching excursions to Buff Wood and Hayley Wood, <i>ca</i> 1969-1990.  Two folders.
B.12-B.18	'Hayley Wood Glade-Shade R.H.-Temp-Radn, 1975-'. Contents of folder so inscribed, divided into seven for ease of reference.  Environmental Biology course supporting notes, research data, etc. <i>re</i> project work at Hayley Wood, 1975-1981.  Coombe was in charge of a project to compare plant growth on calcareous and non-calcareous soils. This work involved the measurement of light intensity, relative humidity and temperature, and there is much research data relating to these.  Includes hemisphere photographs of Coombe with students attending excursions.  Seven folders.

- B.19-B.67 Madingley Wood, Cambridgeshire.
- Madingley Wood is an ancient woodland with a long-recorded history. It is a designated Site of Special Scientific Interest.
- The Wood was purchased by the University of Cambridge in 1948. The material is that of the Madingley Wood Committee later the Committee for Scientific Research on Madingley Estate which was a standing committee of the General Board of the Faculties for the University of Cambridge. The Committee was discharged in 1972 and its responsibilities were charged to the Faculty Board of Biology 'A', Committee on Ecological Reserves. The Committee managed the woodland, brick pits and pastures for the University of Cambridge research and teaching purposes.
- Coombe began research in Madingley Wood in 1950. He was formally involved in the Committee as secretary from 1963-1970. In 1972 he was invited to become a member of the Committee on Ecological Reserves.
- The material consists of a minute book, committee folders and a bundle of correspondence, papers and reports.
- B.19 'Minutes of the Committee for Scientific Research on Madingley Estate'. Hardcover minute book so inscribed on flyleaf.
- Manuscript minutes, 1956-1966.
- Includes letter inserted between pp59-60 *re* discharge of the Committee and the transfer of responsibilities to the Faculty Board of Biology 'A', 1972.
- B.20-B.22 'Purpose and Administration Membership of Committee.' Contents of folder so inscribed, divided into three for ease of reference.
- Correspondence and papers *re* estate management and matters relating to the Committee structure and activities.
- Contents arranged in reverse chronological order.
- B.20 1963-1966.
- B.21 1961-1962.
- B.22 1950-1959.

- B.23-B.27 'Madingley Estate Management & Finance & Brickpits maps & management. Madingley Wood.' Contents of folder so inscribed, divided into five for ease of reference.
- Correspondence and papers *re* estate management and matters relating to the Committee structure and activities. Includes correspondence *re* incorporation of brick pits (also known as the clay pits) within remit of the Committee.

- B.100-B.254**      **Cornwall**      **1949-1998**
- The material in this sub-section relates to research and teaching conducted by Coombe, beginning with his first fieldtrip to Cornwall in 1950 and continuing throughout his career. The Lizard Peninsula, Cornwall, is mainland Britain's most southerly point. The local climate and geology are responsible for the development of a range of heathland types. Coombe's work contributed to the Lizard's designation as a National Nature Reserve in 1976.
- There is frequent reference to 'quadrats' in the papers. These were of various sizes varying between 15cm square up to 18cm square. Quadrats were grouped into specific localities or 'stations'. Detailed surveys were carried out on these where species occurrence, soil types and various other factors were recorded and compared.
- B.100      'Misc'. Contents of folder so inscribed.  
Correspondence, photographs, and research data, 1949-1973.  
Includes correspondence with The National Trust *re* management of Lower Predannack Downs property.

**B.255-B.273 Dorset 1952**

Coombe led a University of Cambridge excursion to Purbeck, Dorset in June 1952. The objective was to study the calcareous grasslands of the region.

The papers consist mainly of research data in the form of species lists, quadrat diagrams and associated notes, graphs, and calculations. There are also some pocket field notebooks at B.267-B.273.

The material is arranged in date order.

B.255 Excursion application forms, nd.

B.256-B.261 'Swanage'. Contents of folder so inscribed, divided into six for ease of reference, 1952.

Research data including species lists, quadrat diagrams and notes, etc.

At B.261 there are 3pp manuscript notes *re* proposed procedures for field work; 2pp manuscript draft for excursion report table of contents; 4pp typescript for excursion report or scientific paper.

Six folders.

B.262-B.265 'Swanage 1952 Statistical Studies on grassland'. Contents of folder so inscribed, divided into four for ease of reference, 1952.

Research data including species lists, diagrams and graphs, etc.

Four folders.

B.266 'Analysis'. Softback notebook so inscribed, 1952.  
Research data including species list.

B.267-B.273 Pocket notebooks containing field notes and research data, 1952.  
Seven items.

**B.274-B.276 Hertfordshire 1965-1975**

Royston Heath, Hertfordshire, also known as Thurston Heath was a region of interest to Coombe because of its calcareous grassland nature. It was used for University of Cambridge environmental biology fieldtrips.

'Royston Heath quadrat data 1968 1969 1965'. Contents of folder so inscribed, divided into three for ease of reference, 1965-1975.

Research data including species recording sheets; etc. Also, environmental biology course fieldtrip handouts and associated printed matter.

Three folders.

**B.277 Inner Hebrides 1962**

Report of 1961 Repton School expedition to Canna Island, Inner Hebrides, with covering letter enclosure addressed to Coombe, 1962.

Coombe was one of the governors of Repton School, Derbyshire.

**B.278-B.288 Norfolk 1920-1984**

Papers relating to University of Cambridge research and teaching activities in Hunstanton, Holme next the Sea, Scolt Head and Burnham Ovary, Norfolk, during the period from 1920 to 1984.

Additional sites in Norfolk can be found described under East Anglia (B.291-B.357).

B.278-B.281 'Holme 1920'. Contents of folder originally the property of A.S. Marsh so inscribed. Divided into four for ease of reference, 1920-1927, 1956.

From 1913 Cambridge Botany School made excursions to the area of Hunstanton and Holme next the Sea to study the ecology of the salt marsh, shingle banks and sand dunes.

B.278 1p manuscript note by Coombe entitled 'Value of the Hunstanton Sand-dunes and Holme-next-Sea Saltmarshes for Teaching', and 2pp typescript papers relating to excursion(s), ca 1956.

B.279 12p manuscript correspondence, excursion report, and notes with 10pp illustrations, 1920.  
  
Reprint of 'The Maritime Ecology of Holme Next the Sea, Norfolk', A.S. Marsh, *Journal of Ecology*, 3(2), pp 65-93, 1915 with intercalated 1p typescript note by Coombe outlining arrangements for a teaching excursion, 1956.

B.280 11pp manuscript notes and illustrations, 1920-1922.

B.281 8pp maps, and 1p photograph of a map mounted on card, 1920-1927.

B.282, B.283 Papers re Scolt Head Island, Norfolk, nd, 1949.

B.282 Tracing, 1949.

B.283 'Scolt Head Island August 1932 Vegetation Map – Phanerogams'. Hand coloured map so entitled, nd.

B.284-B.288 'Burnham Overy Holme Hunstanton exe sheets etc.'. Contents of folder so inscribed, divided into five for ease of reference, 1965-1984.

University of Cambridge environmental biology course handouts; and recording sheets re excursions to Hunstanton, Holme next the Sea, and Burnham Ovary, Norfolk.

Five folders.

**B.289 Malham Tarn, Yorkshire 1949**

Papers re Cambridge University Botany Society excursion to Malham Tarn, Yorkshire, 1949.

10pp index cards with manuscript species lists; and seven photographs of specimens. See also G.439, G.440.

**B.290 Channel Islands 1959-1979**

'Guernsey'. Contents of folder so inscribed.

Papers re species distribution; species identification; and fieldtrips, 1959-1979.

See also B.211, and G.442-G.444.

**B.291-B.357**                      **East Anglia**    **1949-1995**

Coombe's interest in heathland habitats led to much work being carried out in Cambridgeshire, Norfolk and Suffolk. He was particularly interested in the Breckland which straddles the counties of Norfolk and Suffolk. It is a lowland heath habitat where a combination of soil composition, drainage, land use, and climate have combined to create conditions for rare plants. The Breckland meres are noted for their seasonally fluctuating water levels and resultant rare plant occurrence.

The papers in this sub section mainly relate to the Breckland region. There is some material relating to Cambridgeshire locations. Proximity to the University of Cambridge allowed for many environmental biology course fieldtrips to the region. Material related to this is well represented in the papers.

For papers relating to Scott Head Island, Norfolk, and to Hunstanton and Holme next the Sea, Norfolk, see the separate entry for the county of Norfolk.

The papers are arranged in date order, as far as possible.

B.291-B.293                      'Breckland Misc. Watt Thomas Dixon Hewitt photos'. Contents of folder so inscribed, divided into three for ease of reference, nd, 1949-1995.

Correspondence, maps and associated papers *re* observations at various Breckland locations including Weeting Heath, Norfolk.

Arranged in date order with undated material presented at the end of the sequence.

B.291                                      1949-1980.

B.292                                      1983-1995.

B.293                                      nd.

B.294-B.300                      Contents of folder, divided into seven for ease of reference, 1957-1992.

Correspondence, press-cuttings, etc. *re* water levels and other observations at Ringmere, Norfolk.

B.294                                      1p typescript letter with manuscript postscript, 1957.

Three field notebooks attached to the letter are at B.295-B.297.

B.295                                      Field notebook inscribed 'I', nd ca 1950s.

B.296                                      Field notebook inscribed 'II', nd ca 1950s.

B.297                                      Field notebook inscribed 'III', nd ca 1950s.

B.298                                      5pp manuscript notes *re* items at B.294-B.297, 1990.

B.299                                      Press-cuttings, 1959, 1990-1992.

B.300                                      Press-cuttings; annotated photocopy of undated map; and 1p manuscript notes, 1992-1995.

B.301-B.324                      Three folders and one exercise notebook *re* research into vegetation associated with patterned soils i.e., strips and polygons. Includes draft material for unidentified publication, 1954-1987.

B.301-B.303                      'Stripes and Polygons'. Contents of folder so inscribed, divided into three for ease of reference.

Correspondence, papers and photographs.

B.301                                      1954, 1961-1967.

Includes photograph of stripe patterns at Grimes Graves, Norfolk, 1954.

- B.302 Note dated 1976 with negative strip and five photographs attached *re* soil patterns, 1958, 1976.  
  
Photocopy of 2pp manuscript overview for Environmental Biology course *re* Grimes Graves, Norfolk, 1987.
- B.303 Five photographs of unidentified location, nd.  
  
1p manuscript sketch map of unidentified location, nd.
- B.304-B.307 'The Drove, Brettenham: MS. D.E. Coombe'. Contents of folder so inscribed, divided into four for ease of reference, 1961-1974.  
  
Drafts of unidentified publication and associated abstracts of cited publications.
- B.304 20pp typescript draft entitled 'The Drove, Brettenham', nd, latest bibliographical reference, 1961.
- B.305 3pp untitled typescript draft, nd, latest bibliographical reference 1966.
- B.306 21pp typescript and 1p manuscript map of associated abstracts, latest bibliographical reference 1966.
- B.307 1p manuscript research data *re* dry weight samples; 1p press cutting *re* farming conditions, 1974.
- B.308-B.311 'Breck Reprints & Abstracts'. Contents of folder so inscribed, divided into four for ease of reference, 1961-1975.  
  
Correspondence, drafts, research data, and associated cited publications.  
  
Undated material presented at the end of the sequence.
- B.308 14pp manuscript draft, 1961.
- B.309 6pp typescript and 1p manuscript draft material; and 1p typescript list of references, nd, latest bibliographical reference 1966.

- B.310 Correspondence, etc., 1967, 1975.
- B.311 2pp manuscript research data; 1p note *re* Pteridium specimen identification, nd.
- B.312 'Stripes'. Exercise notebook so inscribed, 1961-1980.  
  
The notebook was first used for a 'Stripes & Polygon Excursion' in August 1961. Coombe continued entries thereafter.  
  
Includes 18pp intercalated manuscript notes and press cuttings.
- B.313-B.315 'Dersingham EBLV Master Copies & correspondence'. Contents of folder so inscribed, divided into three for ease of reference, 1958-1979.  
  
Correspondence and handouts *re* University of Cambridge environmental biology course excursions to Dersingham and Wolferton Fens, Norfolk.  
  
Three folders.
- B.316-B.318 University of Cambridge environmental biology course excursions to Grimes Graves, Norfolk and Breckland locations, 1958-1987.
- B.316, B.317 Hand outs and research data including species lists *re* Grimes Graves and Weeting Heath, Norfolk, and Foxhole and Risby Pools Heaths, Suffolk, 1958-1987.  
  
Two folders.
- B.318 'GI 0 – 10 21/8/61 Grimes Graves'. Contents of envelope so inscribed, 1961.  
  
Research data including species lists and soil samples.
- B.319, B.320 Papers *re* Weeting Heath, Norfolk and Thetford Heath, Suffolk, 1959-1960, 1987.

- B.319 'Pt II Thetford & Weeting Stripes'. Contents of folder so inscribed, 1959-1960.  
Research data, etc. Includes aerial photograph of Weeting Heath, Norfolk.
- B.320 'Thetford Heath TI 27/viii/61 6m transect of 12½m x 1m quadrats'. Contents of envelope so inscribed, 1961.  
Research data including species lists and soil samples.
- B.321-328 'Breckland exe'. Contents of folder so inscribed, divided into eight for ease of reference, 1959-1988.  
University of Cambridge environmental biology course handouts, maps and associated papers.  
Includes, at B.327, 2pp manuscript notes for introductory lecture on the Brecklands dated 14 July 1986.  
Eight folders.
- B.329-B.338 A sequence of three envelopes with research data and associated papers *re* Brettenham, Norfolk, 1961-1968.
- B.329-D334 'Brettenham A. Brettenham Mapping 22/8/61. BI Quadrats 22/8/61 = 24 quadrats & BII Quadrats 23/8/61 = 26 quadrats. 50 quadrats.' Contents of envelope so inscribed, divided into six for ease of reference, nd, 1961, 1963.  
Research data includes species lists; soil samples; quadrat diagrams; etc.  
Includes, at B.334, eighteen photographs which appear to be two sequences related to a study of leaf growth and leaf area.  
Six folders.
- B.335-B.337 'Brettenham B. Brettenham III & IV 24/viii/61 & 25/viii/1961'. Contents of envelope so inscribed, divided into three for ease of reference, nd, 1963, 1967-1968.  
Research data includes species lists; quadrat diagrams; etc.  
Includes, at B.337, two black and white photographic prints original enclosure inscribed 'Brettenham Ulex 28/8/61'.  
Three folders.

- B.338 'Brettenham C + misc pH data from Brettenham'. Contents of folder so inscribed, 1963-1968.  
Research data including graph relating to root penetration in soils; quadrat diagrams; species lists; soil samples; etc.
- B.339, B.340 'Weeting Heath WI 0-10 19/8/61'. Contents of envelope so inscribed, divided into two for ease of reference, 1961.  
Research data including species lists and soil samples data *re* Weeting Heath, Suffolk.
- B.341 'Eriswell High Warren EI 0-12 18/8/61'. Contents of envelope so inscribed, 1961.  
Research data including species lists and soil samples *re* Eriswell High Warren, Suffolk.
- B.342-B.344 University of Cambridge environmental biology course handouts, maps and associated papers, 1965-1987.  
The papers relate to course excursions to locations in East Anglia, including Chippenham Fen, Ditton Park Wood, Fleam Dyke, Hardwick Wood, Madingley Brick Pits, etc.  
Three folders.
- B.345 Contents of portfolio, 1967-1982.  
17pp pH measurements and species occurrence data mainly *re* Lackenheath Warren, Suffolk but also including Thetford Heath, Suffolk, 1967-1980.  
17pp graphs, 14pp schematic maps, and 19pp research data *re* stripes research, covering issues of species occurrence, soil pH, soil moisture content, soil composition, and aspects of barley and sugar beet growth at Grimes Graves, Norfolk, 1968-1982.

- B.346-B.351 Contents of folder, divided into six for ease of reference, nd, ca 1968-1994.  
Correspondence and papers *re* water levels and groundwater abstraction in the Breckland meres.
- B.346 Two leaflets entitled 'The Great Ouse Groundwater Scheme' and 'The Ely Ouse Essex Water Transfer Scheme', Anglian Water Authority, nd, ca 1968.
- B.347 5pp typescript with graph entitled 'The Great Ouse Ground Water Pilot Scheme', The Nature Conservancy, 1971.
- B.348 4pp typescript with table entitled 'The Breckland Meres', 1973.

Funding for Coombe's expedition to Nigeria and the Cameroons was provided by the Royal Society and Nuffield Foundation Commonwealth Bursary. Coombe was based at University College, Ibadan, Nigeria but travelled extensively during the course of the visit, December 1954 to March 1955. Coombe's outward trip was made by air. The return trip was aboard the M.V. Aureol, Elder Dempster Lines Ltd. He used the opportunity of a day's stop over at Takoradi, Gold Coast (now present-day Ghana), to carry out some additional work.  
Coombe's objective was to study structure, floristic composition and light factors in rain forests. Additionally, he collected specimens for the Royal Botanic Gardens, Kew and studied the savannah habitat of the region.

Ecologist A.G. Tansley began The International Phytogeographical Excursions in 1911. Their objective was to visit different countries and introduce visiting scientists, in the fields of geography and botany, to local plants in various geographical landscapes. By doing so it was hoped to develop an international consensus on the concepts and language of ecological plant geography. Coombe joined the Eleventh International Phytogeographical Excursion which explored the Austria Alps, and neighbouring countries, in July and August 1956.

**1957-1967**

- E.1 'ASW 1957'. Pocket notebook so inscribed, 1957.  
Notes of lecture course given by A.S. Watt, FRS of the Botany School, University of Cambridge.  
A.S. Watt was a key figure in the study of ecology with particular interests in beechwoods and the Brecklands of East Anglia.
- E.2 'Part I: Plant & Environment Easter Term: 1960'. Contents of spiral bound notebook so inscribed, 1960-1962.  
Notes for lecture course.  
With 7pp intercalated notes *re* revisions.

- E.3 'Part II Courses. Lecture I 1959 [Productivity notes] Synopsis of 1959 lectures Piggott 1961'. Contents of spiral bound notebook so inscribed, 1959-1964.  
Notes for lecture course annotated with revisions. Includes at rear, notes of lecture course on plants and soil by C.D. Piggott in 1961.  
With 4pp intercalated notes.
- E.4 'Part II Courses Lectures II-IV 1959'. Contents of spiral bound notebook so inscribed, 1959-1971.  
Notes for lecture course annotated with revisions.  
With 10pp intercalated notes *re* revisions.
- E.5 'Part II Courses Lectures V-VIII 1959 Lecture III 1963 IV 163 Section B'. Contents of spiral bound notebook so inscribed, 1959-1965.  
Notes for lecture course annotated with revisions.  
With 3pp intercalated notes *re* revisions.
- E.6 'Plants and their Environment Second Year Easter Term 1961'. Contents of spiral bound notebook so inscribed on inside page, 1961-1966.  
Notes for lecture course annotated with revisions.  
With 2pp intercalated notes *re* revisions.
- E.7 'Long Vacation: Part II E.B.'. Contents of spiral bound notebook so inscribed on inside page, 1967-1979.  
Notes for lecture course annotated with revisions.

<b>E.8-E.23</b>	<b>COURSE MATERIAL</b>	<b>1941-1989</b>
	<p>The material below relates to parts I and II undergraduate teaching by Coombe, and colleagues, at the Botany School, University of Cambridge. It is mainly composed of lecture notes, handouts, timetables, coursework, and associated papers. Similar material can be found at Section B Research Interests: British Isles and Overseas Habitats where it is more closely associated with specific excursions.</p>	
E.8-E.11	<p>1941-1989.</p> <p>Coombe was responsible for teaching plant soil relationships in part II of the course.</p> <p>Four folders.</p>	
E.12	<p>1959-1966.</p> <p>Includes notes on field work techniques by Coombe.</p>	
E.13	<p>1963.</p> <p>1pp typescript entitled 'Photobiology Group: Cambridge: 27 September 1963: D.E. Coombe', 1963.</p>

**G.71-G.283                      BRITISH ISLES HABITATS: BY DATE                      1969-1996**

This sub-section consists of colour photographic prints, mostly in envelopes. The exterior of the envelopes and the reverse side of the photographs have inscriptions *re* date, species, and location, in the hand of Oliver Rackham. The information appears to have been gleaned from the original photograph wallets. These have not survived although occasionally, segments with Coombe's manuscript notes, were found enclosed with the photographs. Negative strips have not been retained with the exception of G.271 and G.272.

See also C.165-C.190 for related field notebooks.

- G.71                      'Hookeria lucens Near the Brickpit, Wicken Fen 8 March 1969'. Colour photographic print so inscribed on rear, 1969.

This sub-section contains material relating to published (and unpublished) scientific papers and letters to newspapers. See also H.1-H.23 above. The material is arranged by date of associated publication.

At the end of the sub-section is a list of publications which Coombe drew up *ca* 1977 as well as a list of proposed papers he planned to write around that time.

H.24-H.27                      'Notes on Calcicolous Communities and Peat Formation in Norwegian Lappland', D.E. Coombe and F. White, *Journal of Ecology*, **39(1)**, 1951.

Correspondence and papers including draft material, 1950.

Four folders.

H.28                              'Ancient Earthworks', letter to *The Times*, 26 April 1954.

Press cutting and 1p manuscript draft, 1954.

H.29-H.50                      'Biological Flora of the British Isles *Impatiens parviflora* DC.', D.E. Coombe, *Journal of Ecology*, **44(2)**, 1956.

Correspondence, papers and research data including draft material, 1948-1989.

Twenty-two folders.

H.51                              'Review of *Flora of the British Isles*, A.R. Clapham, T.G. Tutin and E.F. Warburg.', D.E. Coombe, *The Cambridge Review*, **74(1796)**, 1952.

5pp manuscript draft and complement slip note, 1952.

H.52-H.55                      'The Wordsworths and Botany', D.E. Coombe, *Notes and Queries*, **197(14)**, 1952.

Correspondence and papers including draft material, 1951-1953.

Includes additional papers *re* an exhibition of botanical books and a typescript paper by Coombe entitled 'Metasequoia glyptostroboides Hu & Cheng'.

Four folders.

H.56                              Unidentified publication, nd.

6pp proofs entitled 'Botany'. The material consists of detailed encyclopaedia type entries outlining the history of the science, 1956-1957.

H.57-H.63                      'The Heaths of the Cornish Serpentine', by D.E. Coombe and L.C. Frost, *Journal of Ecology*, **44(1)**, 1956, and 'The Nature and Origin of the Soils over the Cornish Serpentine', D.E. Coombe and L.C. Frost, M. Le Bas, and W. Watters, *Journal of Ecology*, **44(2)**, 1956.

Correspondence, papers and research data including draft material, 1955-1957.

Seven folders.

H.64-H.76                      'An Analysis of the Growth of *Trema guineensis*', D.E. Coombe, *Journal of Ecology*, **48(1)**, 1960.

Five folders of correspondence, papers and research data including draft material, 1957-1961.

Thirteen folders.

H.77                              'Biological Flora of the British Isles *Spergula arvensis* L.', J.K. New, *Journal of Ecology*, **49(1)**, 1961.

1p typescript draft and 1p manuscript notes, 1960.

H.78-H.81                      *Flora Europaea* 2, T.G. Tutin, et al, Cambridge University Press, 1968.

*Flora Europaea* was a five-volume study of the flora of Europe published between 1964 and 1980. Coombe contributed to volume 2 on the subject of the genus *Trifolium*. There is also some correspondence *re* his contribution, on the same subject, in *Flora of the British Isles*, T.G. Tutin, et al, Cambridge University Press, 1952.

Correspondence, papers and research data including draft material, 1956-1981.

Four folders.

H.82                              'In Free Time', letter to *The Times*, 2 December 1969.

Press cuttings; 1p manuscript draft; 1p typescript draft, 1969.

- H.83-H.85 'Hedges', letter to *The Times*, 6 April 1970.  
Correspondence, drafts and press cuttings, 1969-1974.  
Three folders.
- H.86-H.90 'Further Observations on *Trifolium occidentale*', D.E. Coombe and P. Morisset, *Watsonia*, **6(5)**, 1967.  
Correspondence, papers and research data including draft material, 1966-1967.  
Five folders.
- H.91-H.93 'The editions of *A week at the Lizard* by the Revd Charles Alexander Johns', D.E. Coombe, *Journal of the Society for the Bibliography of Natural History*, **5(4)**, 1970.  
Correspondence and papers, 1968-1997.  
Three folders.
- H.94 Obituary for Albert Ernest Kempton, Physicist, (1911-2000), 1971-1973.  
Correspondence and papers.  
Coombe was asked to write an obituary for *The Times*. The obituary does not appear to have been published.
- H.95 Dictionary of Scientific Biography 7, Iamblichus-Karl Landsteiner, ed C.C. Gillispie, Scribner's, 1973., 1970-1974  
Coombe contributed an entry on Thomas Johnson, early seventeenth-century botanist.  
Correspondence and papers, 1970-1974.
- H.96 'An anthology of very wildflowers', *The Lizard*, **5(2)**, 1975; 'An anthology of very wildflowers round the coast. Part 2', *The Lizard*, 5(3), 1975; 'An anthology of very wildflowers round the coast. Part 3', publication details unknown, 1973-1976.  
Correspondence and draft material *re* humorous verses intended for publication in *The Lizard*, the magazine of The Lizard Field Club.

- H.97-H.109 'Air photography in plant ecology' in *The Uses of Air Photography*, ed J.K.S. St. Joseph, 1977.  
Correspondence, drafts, photographs and research data, 1967-1976.  
Thirteen folders.
- H.110 *Diary of Botanical Reminiscences*, E.A. Rees, unpublished, 1950.  
Correspondence and papers *re* proposed publication edited by Coombe, 1950-1983.  
Coombe abandoned the project owing to pressures of work.
- H.111 'Review of *A New Key to Wild Flowers*, John Hayward', D.E. Coombe, *Endeavour*, **12(1)**, 1988.  
1p typescript draft, nd ca 1988.
- H.112, H.113 'The assessment of change and growth in temperate woodland from hemispherical photographs: evaluation of the thirty-seven-year long series from Madingley Wood', G. Stanhill, P. Freeman, D.E. Coombe, and J.G.W. Hodge, unpublished, 1988-1989.  
The paper was rejected by *The Journal of Ecology* in 1989 and remained unpublished.  
Correspondence and drafts, 1988-1989.  
Two folders.
- H.114-H.124 'Maritime' Plants of Roads in Cambridgeshire (v.c.29)', D.E. Coombe, *Nature in Cambridgeshire*, **36**, 1994.  
Correspondence, papers, drafts and press cuttings, 1992-1994.  
Eleven folders.
- H.124-127 'Madingley Wood', O. Rackham and D.E. Coombe, *Nature in Cambridgeshire*, **38**, 1996.  
Correspondence, papers and drafts, 1995-1996.  
Four folders.

- H.128, H.129 Madingley Wood: Thirty-five years of change in the features of the canopy, J.G.W. Hodge, Phd Thesis, 1986.  
Two folders.
- H.130-H.133 British Red Data Book: 1 Vascular plants, Third Edition, ed M.J. Wigginton, Joint Nature Conservation Committee, 1999.  
Coombe contributed an account of *Erica vagans* L.  
Drafts and associated papers, 1990-1996.  
Four folders.
- H.134-H.154 INVITATIONAL LECTURES, CONFERENCES, ETC. 1950-1995**
- This subsection contains material relating to lectures given at various events and venues. It also includes material relating to conferences, etc. where Coombe presented exhibitions and gave lectures. The material is arranged, as far as is possible, according to the date of the associated event.
- H.134-H.138 Correspondence and papers, including notes for lectures given to the Breckland Research Council and to unidentified bodies, 1950-1956.  
Unidentified bodies to which Coombe gave lectures include the C.U.N.S.C. This was possibly the Cambridge University Nature Society. He also gave a lecture to the 'Ecological Society', which may have been the British Ecological Society. Topics addressed in the lectures include the limitations of field studies; plant toxins as inhibitors of rival plant growth; and environmental conditions (specifically photoperiodism) affecting flowering of *impatiens parviflora* and *Impatiens noli-tangere*.  
Five folders.
- H.139 The Royal Society Conversazione, 10 May 1956.  
Correspondence and papers re exhibition entitled 'Hemispherical Photography under Forest Canopy in England and Nigeria', 1956.

- H.140 Reading University Botany Society, October 1969.  
Letter inviting Coombe to lecture on the provisional topic of 'Some botanical curiosities of the Lizard', 1969.
- H.141 British Ecological Society International Symposium on 'The Scientific Management of Animal and Plant Communities for Conservation', University of East Anglia, Norwich, UK, 7-9 July 1970.  
Coombe and L.C. Frost presented a paper entitled 'The Management of Habitats of *Juncus capitatus* and *J. mutabilis* on the Lizard Peninsula, W. Cornwall'. Coombe also guided a day tour to the Wicken Fen, Cambridgeshire and the Brecklands, East Anglia, during the course of the Symposium.  
Correspondence and papers, 1969-1970.
- H.142 The Symantics Association International Symposium on 'The Interrelations of Taxonomy and Ecology', University of Reading, Berkshire, UK, 11-14 September 1972.  
Coombe presented a lecture entitled 'Ecological Taxonomy at the Lizard'.  
Correspondence and papers, 1972.
- H.143 Ashmolean Natural History Society of Oxfordshire, Oxford, UK, 22 May 1973.  
Coombe presented a lecture entitled 'Ecological Taxonomy of the Lizard Peninsula'.  
Correspondence and papers, 1972-1973.
- H.144, H.145 Botanical Society of the British Isles Annual Exhibition, British Museum (Natural History), London, UK, 28 November 1981.  
Coombe presented an exhibit entitled 'The Rottingdean *Limonium*'.  
Notes, including list of exhibits; papers and correspondence, 1981-1984.  
Two folders.

- H.146 'Uses of Air Photography in Environmental Biology', 4 August 1984.  
2pp manuscript list of slides, index card notes and two aerial photographs of Stonehenge, Wiltshire, UK, 1906.
- H.147, H.148 Botanical Society of the British Isles Annual Exhibition, British Museum (Natural History), London, UK, 28 November 1987.  
Coombe presented an exhibit entitled 'Propagation of *Polygonum maritimum* L.'.  
Correspondence and papers, 1987-1988.  
Two folders.
- H.149-H.154 Botanical Society of the British Isles Annual Exhibition, British Museum (Natural History), London, UK, 25 November 1989.  
Coombe presented two exhibits. The first was entitled '*Lythrum hyssopifolia* L.: two postscripts'. The second, co-presented with Mrs G. Crompton, was entitled '*Ferula communis* L.: mythology and biology'.  
Correspondence, list of exhibits, papers and photographs, 1989, 1994.  
Six folders.
- H.155 Botanical Society of the British Isles Annual Exhibition, British Museum (Natural History), London, UK, November 1991.  
Coombe presented an exhibit relating to *Ophioglossum lusitanicum* L. and *Cymbalaria muralis f. toutonii* P.  
7pp caption cards with mounted photographs and nine loose photographs, ca 1991.

**SECTION J                      HORSELL PAPERS                      J.1-J.9**

The papers in this section are those of Miss M. Horsell, 72 Pultney Street, Bath, Somerset. They relate to Horsell's interest in recording plant species occurring in the south-west United Kingdom.

- J.1-J.3                      NOTEBOOKS  
J.4-J.9                      CORRESPONDENCE, PLANS, NOTES

**J.1-J.3                      NOTEBOOKS                      ca 1910s-1950s**

- J.1                      Hardback notebook with plant lists, their locations and additional notes, ca 1920s-1940s.  
Includes 7pp intercalated material.
- J.2                      Softcover notebook with locations and plant lists, ca 1910s-1950s.  
Includes 2pp intercalated material.
- J.3                      Hardback notebook with manuscript transcript of *Flora Bathoniensis: or, A Catalogue of the Plants Indigenous to the Vicinity of Bath*, C.C. Babington, 1834. Pasted on the inside cover is a 7pp article entitled 'The Botany of the Bath District', W.G. Wheatcroft, nd.  
There are numerous annotations in Coombe's hand.  
Includes 1p intercalated material.

**J.4-J.9                      CORRESPONDENCE, PLANS, NOTES                      1929-1955**

Dates given below are for dated correspondence amongst the material.  
Notes and plans tend not to be dated.

J.4	Contents of envelope inscribed 'Plans Higinbothom', 1929-1939.
J.5	Contents of envelope inscribed 'Plans Grose', 1935-1943.
J.6	Contents of envelope inscribed 'Plans Miscellaneous People', 1936-1943.
J.7	Contents of envelope inscribed 'Various odd plans (not entered in book) all Comdrs', 1938.
J.8	Contents of envelope inscribed 'Miss Miller', 1941.
J.9	Correspondence <i>re</i> field trip to North Downs, Surrey, 1955.
