

# University of Bath operating levels

The wellbeing, safety and health of all members of our community is a fundamental priority for the University, and these considerations are at the core of our plans. This grid aims to give our students and staff an indication of the way the University will operate under each UK Government alert level. We understand that we've all experienced a great deal of uncertainty and change in the last few months. We are designing our plans to be as future-proof as possible, so we are agile enough to respond to any changes in government guidance, whilst enabling our students and staff to study and work in a supportive and welcoming environment.
